The invention concerns a procedure for paying by transfer by means of exchange of electronic data. According to invention, a simple and reliable paying transaction is possible, as at least customized data will wirelessly transfer between a user electronic mechanism and a dealer-lateral paying terminal, and on the basis the data becomes, initiated by a central mechanism, a paying transaction accomplished. The data relevant for the transaction is kept central in customer and dealer databases.

The identification of any document in this statement is not intended to be, and should not be understood as being, an admission that each such document, in fact, constitutes "prior art" within the meaning of applicable law.

Applicant respectfully requests that the documents cited in this statement be made of record in the normal manner and that such documents appear on the printed patent as being considered and made of record.

Respectfully submitted,
